

Ryan Blackwood

Test Engineer Candidate | Electronics • Diagnostics • System Validation

ryan.j.blackwood@gmail.com | Bloomington, MN

SUMMARY

Hands-on technician transitioning into test engineering with strong experience in electronics repair, system diagnostics, and real-world troubleshooting. Proven ability to isolate failures, validate system performance, and improve workflow efficiency. Brings a practical, detail-oriented mindset focused on reliability, repeatability, and clean execution in technical environments.

CORE SKILLS

- Failure analysis & root cause troubleshooting
- Electronics diagnostics, repair, and validation
- Hardware/software system testing mindset
- Computer systems, components, and peripherals
- Workflow optimization & process improvement
- 3D printing & CAD prototyping (FreeCAD)
- Basic networking & infrastructure systems

EXPERIENCE

Detector Electronics — Material Handler (Oct 2024 – Present)

- Support production and testing workflows with accurate material handling and tracking
- Maintain organized systems that reduce errors and improve operational efficiency
- Work within engineering-focused processes, supporting product flow and readiness for testing

Best Buy — Warehouse Team Lead (Aug 2021 – Apr 2023)

- Led inventory and logistics operations for high-value technical equipment
- Improved workflow efficiency and reduced handling inconsistencies
- Coordinated team operations in fast-paced, accuracy-driven environment

Geek Squad — Repair Agent (Feb 2020 – Aug 2021)

- Diagnosed and repaired hardware and software issues across a wide range of systems
- Validated system performance post-repair to ensure reliability and functionality
- Maintained quality control standards across all completed repairs

Geek Squad — Consultation Agent (Jun 2018 – Feb 2020)

- Identified customer technical issues and translated them into clear solutions
- Built strong troubleshooting, communication, and problem isolation skills
- Improved customer outcomes through accurate diagnosis and recommendations

TECHNICAL PROJECTS

- Homelab system with VLANs, routing, and WireGuard networking
- Custom-built computers, diagnostics, and system optimization
- 3D printed functional parts designed in FreeCAD for real-world use
- Game systems development (AI behavior, optimization, system design)

EDUCATION

Pinellas Gulf Coast Academy — High School Diploma (2020)
